EXPERIENCE

Brandrevam
April 2026 – Present

Full-Stack Developer | Client Projects (Fiverr & Upwork)

- Contribute to **client-facing web applications and SaaS projects** for a service-based company delivering work through Fiverr and Upwork
- Develop **responsive user interfaces and backend features** based on client requirements and project designs
- Use **AI-assisted development tools** such as Cursor and Google Antigravity to accelerate UI implementation, debugging, code iteration, and delivery
- Collaborate with team members on **feature development, bug fixes, testing, deployment updates, and ongoing maintenance**
- Contributed to client projects including Quickycell, Root, Prepit, OneDMI+, Esnad, and The Last Battalion
- Coordinate **completed and in-progress deliverables** with the team to keep development aligned with client requirements and project priorities

Applotech
2025 – Present

MERN Stack Developer

- **1+ year of professional experience** building scalable web applications and production-grade software using the MERN stack
- Developed and maintained **scalable, real-time backend systems** using Node.js, Express.js, and databases for multiple products
- Engineered **multi-tenant SaaS applications**, including **E-commerce Management Systems**, **Client Management Systems**, and **Learning Management Systems**
- Designed APIs and **database architecture** with a focus on performance, scalability, and clean system design
- Worked across **backend and frontend development**, contributing to multiple live production websites
- **Delivered responsive, modern UI implementations** for client projects, including Pearl Linens, Dresswell Tailors, Doctor Duct Canada, Shiwani Textile, and Vital General Maintenance
- Collaborated with cross-functional teams to deliver **high-quality, client-focused solutions** in fast-paced environments
